

The Uninsured: A Closer Look

Families USA • March 2009

New Hampshirites without Health Insurance

Every year, the U.S. Census Bureau—in its Current Population Survey (CPS)—reports the number of people who are uninsured. This widely quoted number is intended to offer an estimate of how many people did not have any type of health insurance at any point in time during the previous calendar year.

There are many people, however, who are uninsured for a portion of a year but not for the entire year. Though these individuals may suffer severe consequences to their health and their economic well-being as a result of being uninsured, they are not included in the Census Bureau's number.

In March 2009, Families USA released a new report, *Americans at Risk: One in Three Uninsured*, which was designed to provide a comprehensive picture of how many Americans were directly affected by the lack of health coverage in 2007-2008. That report contains national data, as well as a detailed discussion of the methodology, and it is available online at www.familiesusa.org. This fact sheet presents new state-specific data that mirror the national data in *Americans at Risk*.

Non-Elderly New Hampshirites Without Health Insurance In 2007-2008

- Nearly one out of four people (24.1 percent) in New Hampshire under the age of 65 went without health insurance for all or part of the two-year period 2007-2008 (see chart).
- Of the 279,000 uninsured New Hampshirites, nearly three-quarters (72.4 percent) went without health coverage for six months or longer during this period.

Likelihood of New Hampshirites under Age 65 Being Uninsured during 2007-2008

State Population <65	1,158,000
Number Uninsured	279,000
Percent Uninsured	24.1%

Likelihood of Uninsured New Hampshirites Under Age 65 Remaining Uninsured for Six Or More Months during 2007-2008

New Hampshire's Communities of Color Without Health Insurance

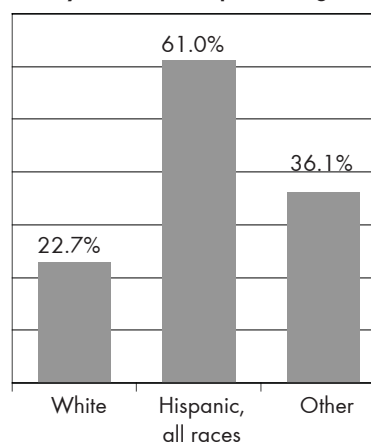

- People of racial and ethnic minorities are more likely to go without health insurance than whites. In New Hampshire, 61.0 percent of Hispanics/Latinos and 36.1 percent of “other” ethnic minorities were uninsured, compared to 22.7 percent of whites. (Due to the small sample size, data on African Americans in New Hampshire are not reportable.)
- Despite the fact that people of color are far more likely to be uninsured, white New Hampshirites made up the largest category (87.9 percent) of people under the age of 65 without health insurance for all or part of the two-year period.
- The category of “other” is composed of individuals who identify themselves as American Indian, Aleut or Eskimo, Asian or Pacific Islander, or who identify themselves as a member of more than one group (e.g., white-black, white-Asian, black-Asian).

Likelihood of New Hampshirites under Age 65 Being Uninsured During 2007-2008, by Race and Hispanic

Race and Hispanic Origin	Total Number	Number Uninsured	Percent of Subgroup Uninsured
White	1,078,000	245,000	22.7%
African American	*	*	*
Hispanic, all races	27,000	16,000	61.0%
Other	39,000	14,000	36.1%

* Due to small sample size, data not reportable.

Percent Uninsured during 2007-2008, By Race and Hispanic Origin

Working New Hampshirites Without Health Insurance

- Most uninsured New Hampshirites (84.9 percent) are members of working families.
- The remaining 11.6 percent of uninsured New Hampshirites who were not working were either actively searching for employment or were not in the labor force because they were disabled, chronically ill, family caregivers, or not looking for employment for other reasons.

Employment Status of Uninsured New Hampshirites under Age 65 during 2007-2008

	Employed (full- or part-time)	Unemployed (seeking work)	Not in Labor Force
Number	237,000	*	32,000
Percent	84.9%	*	11.6%

* Due to small sample size, data not reportable.

Family Employment Status of Uninsured

* Due to small sample size, data not reportable.

Low-Income New Hampshire Residents Without Health Insurance

- Families in New Hampshire with incomes below 200 percent of the federal poverty level (\$20,800 a year for a single adult and \$35,200 a year for a family of three in 2008) were much more likely to be uninsured than families with incomes at or above 200 percent of poverty.

Likelihood of New Hampshire Residents under Age 65 Being Uninsured During 2007-2008, by Income Level

Income (as percent of federal poverty level)	Population	Number Uninsured	Percent of Income Group Uninsured
Income below 200% of Poverty	187,000	96,000	51.4%
Income at or above 200% of Poverty	971,000	183,000	18.9%

Percent Uninsured during 2007-2008, by Income
